1/ Source of Data: ESARS (Employment Security Automated Reporting System). Includes those applicants registered for work in Nebraska Job Service Offices, and whose applications remained active as of June 30, 1987. These totals do not include all persons in Nebraska seeking jobs as of June 30, 1987. Also, one-digit occupational group totals include applicants assigned an entry code (lacking experience and/or training needed for a complete occupational classification). In the case of occupational group totals for clerical and sales, service, and miscellaneous, the entry codes are included in the total but cannot be assigned to the selected two-digit occupational subgroups shown, and consequently those subgroup totals will not add to the occupational group total.

2/ Total includes those not assigned an occupational code.

3/ Includes Black (not Hispanic), Hispanic, and other races. "Other races", include American Indian or Alaskan Native, Asian or Pacific Islander, and others.

4/ Includes mining, logging, utilities, miscellaneous amusement and recreation, graphic art work.

MARCH 1st 1867

NEBRASKA DEPARTMENT OF LABOR
ADMINISTRATIVE SERVICES DIVISION
Robert H. Shanahan • Director of Administrative Services
Wendell O. Olson • Labor Market Information Administrator

Information, The Cutting Edge of Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a voluntary survey of Nebraska Nonmanufacturing Industries. Nebraska is participating in a nationwide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on current employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information is demonstrated by the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides some firms with indicators of potential types of jobs available in their industries and area labor market.

The Occupational Employment Survey is done only once every three years for each industry. This year (1988) the balance of nonmanufacturing industries will be surveyed. The next year (1989) the manufacturing and hospitals industries are to be surveyed. The third year (1990) will cover the nonmanufacturing industries.

Due to the size of the industry, nonmanufacturing industries survey participants were selected on a random sample basis.

ATTENTION!! You may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

Wendell O. Olson • Labor Market Information Administrator

Information, The Cutting Edge of Competition

The Nebraska Department of Labor, through the Labor Market Information (LMI) division, in cooperation with the U.S. Bureau of Labor Statistics (BLS) and the Employment and Training Administration, is conducting a voluntary survey of Nebraska Nonmanufacturing Industries. Nebraska is participating in a nationwide Occupational Employment Statistics (OES) survey program designed to produce state and regional data on current employment for use in planning education and training programs. Occupational Employment Statistics from this survey will also be used to design career information materials. This type of survey provides a consistent approach for gathering employment data among the cooperating State Employment Security Agencies and the U.S. Bureau of Labor Statistics to develop current estimates and projections of national occupational requirements.

Evidence of the value of Occupational Information is demonstrated by the requests for Occupational Information received from employers, business consultants, developers and planners. They tell us that business firms who depend on the interest, skills and talents of their workers have a great need for Occupational Information. It provides some firms with indicators of potential types of jobs available in their industries and area labor market.

The Occupational Employment Survey is done only once every three years for each industry. This year (1988) the balance of nonmanufacturing industries will be surveyed. The next year (1989) the manufacturing and hospitals industries are to be surveyed. The third year (1990) will cover the nonmanufacturing industries.

Due to the size of the industry, nonmanufacturing industries survey participants were selected on a random sample basis.

ATTENTION!! You may have already been chosen as a survey participant. If you have, please help Labor Market Information provide you and others with the most detailed and accurate information available. You can do this by promptly completing the survey form and returning it to Labor Market Information as soon as possible.

1/ Source of Data: ESARS (Employment Security Automated Reporting System). Includes those applicants registered for work in Nebraska Job Service Offices, and whose applications remained active as of June 30, 1988. These totals do not include all persons in Nebraska seeking jobs as of June 30, 1988. Also, one-digit occupational group totals include applicants assigned an entry code (lacking experience and/or training needed for a complete occupational classification). In the case of occupational group totals for clerical and sales, service, and miscellaneous, the entry codes are included in the total but cannot be assigned to the selected two-digit occupational subgroups shown, and consequently those subgroup totals will not add to the occupational group total.

2/ Total includes those not assigned an occupational code.

3/ Includes Black (not Hispanic), Hispanic, and other races. "Other races", include American Indian or Alaskan Native, Asian or Pacific Islander, and others.

4/ Includes mining, logging, utilities, miscellaneous amusement and recreation, graphic art work.

UNEMPLOYMENT INSURANCE CLAIMS ANALYSIS

THE WEEK ENDING JUNE 25, 1988

MONTH TO MONTH

MAY 1988 vs JUNE 1988

While the May to June claims for unemployment insurance decline of 398 or (6%) is small, it is a positive sign in light of the fact that for the last seven years claims have increased an average of 3% from May to June.The decline in Nebraska claims of 398 or (6%) is largely the result of improvements in manufacturing and construction. The decline outside of Omaha and Lincoln was 475 or (16%). manufacturing claims were down 503 or (31%) and construction 215 claims were down (32%), and these accounted for the major portions of this decline.The small decline of 12 claims in Omaha (1%) can be explained by an increase in of 70 transit claims.The rise of 89 Lincoln claims (9%) is more than accounted for by the increase of 172 claims in Miscellaneous Retail Trade. This is the same factor which accounted for the Lincoln not following the statewide pattern for year-to-year level of claims activities.Average duration of benefits increased one-tenth of a week from May 1988. The average duration of benefits for June was 12.2 weeks compared to 12.1 weeks in May and 12.5 weeks in June of 1987.The average weekly benefit amount (WBA) for June 1988 was $108.94 a decline of $6.56 or (6.%) from $115.50 in May 1988.

NOTE: The May average was higher than June due mainly due to large payments to laid-off workers which had been delayed due to processing because of a dispute. The average WBA was up $3.23 or (3.1%) from June of 1987.

YEAR TO YEAR

CLAIMS ARE BELOW THE YEAR AGO LEVEL FOR THE 26TH CONSECUTIVE MONTH.

Claims for June 1988 were down by 1.997 or (25%) from June 1987. Lower levels of claims were shared by all areas: Omaha 872 or (27%), Balance of State 1066 (30%) and Lincoln, to a lesser extent, 59 (5%). The reason Lincoln did not decline as much as Omaha and the Balance of State is due to an increase of 180 claims in Miscelaneous Retail Trade.When analyzed by industry it is clear that while claims declined in all industries, the most significant claims declines occurred in Manufacturing 762 (40%) and Construction 404 (46%) statewide. The claims decline in these industries were shared by all areas of the state.
